# WELCOME TO THE SEECHANGE HEALTH PPO PRODUCT

We are excited that you have selected SeeChange Health.

The SeeChange Health plan allows you to choose your own doctors and hospitals for all your health care needs; and take advantage of significant cost savings when you use doctors contracted with us.

Like most PPO plans, we offer two different ways to access care:

- Network, meaning you choose a doctor (or hospital) contracted with us.
- Non-network, meaning you choose a doctor (or hospital) not contracted with us.

Your choice of doctors and hospitals may determine which services will be covered, as well as how much you will pay\*. In some instances, certification is required for full benefits (see the *Schedule of Benefits*).

**To maximize the benefits received under this SeeChange Health PPO insurance plan, you must use Preferred Providers.**

## HOW DO I USE THIS PROVIDER DIRECTORY?

This provider directory lists **SeeChange Health preferred** network providers: the physicians, clinics and hospitals.

You can use this directory to select a primary care doctor for yourself and for each member of your family who is covered under your SeeChange Health PPO plan.

**Enrolling in SeeChange Health does not guarantee services by a particular provider on this list. If you wish to be certain of receiving care from a specific provider listed, you should contact SeeChange Health Member Service to ask whether or not the provider is still a SeeChange Health provider, and you should contact that provider to see whether or not they are accepting additional patients. You can reach SeeChange Health Member Service at [\*\*\(888\) 866-8733\*\*](tel:8888668733).**

**In addition, providers are added to the SeeChange Health network regularly, and this directory may not include these additions. Again, we recommend you call SeeChange Health Member Service to verify that your provider is currently part of the SeeChange Health network.**

## **SOME TERMS YOU SHOULD KNOW**

### **Provider**

A physician, clinic, hospital, pharmacy or other health care professional or facility that is licensed, certified or otherwise qualified under state law to provide health care services.

### **Specialist**

A provider whose medical specialty is not in the field of family/general practice, internal medicine or pediatrics.

### **Network Provider**

A network provider (such as a hospital or physician) that has a contract with SeeChange Health to provide medical services to SeeChange members.

### **Non-Network Provider**

A provider that is not a SeeChange Health network provider. You may receive health services from a non-network provider, but generally at a lower coverage level. (For more information, see your Schedule of Benefits document.)

### **Urgent care center**

A health care facility whose primary purpose is to offer and provide immediate, short-term medical care for minor medical conditions. Urgent care centers may be free standing or located in a clinic, facility or hospital. Although they may be located in a hospital, an urgent care center is different than a hospital emergency room, which provides immediate care for life-threatening illnesses or injuries.

### **Emergency**

A condition that requires immediate treatment to:

1. prevent serious impairment to your bodily function, organs, or parts; or
2. prevent placing your physical or mental health in serious jeopardy.

### **Urgent Care Center or Emergency Room?**

Do you know where to go for medical care after your doctor's office has closed for the night or weekend?

Many people drive straight to a hospital emergency room. In many cases, however, they could save themselves a lot of time and money by going to an urgent care center instead.

If your medical condition is not serious, you may have to wait a long time for care at an emergency room. Also, your share of what you must pay the hospital will be much higher.

Urgent care centers are not intended for routine medical visits, which can be scheduled and provided by your primary care clinic. They are usually open after 5 p.m., Monday through Friday, and on weekends and holidays – the times when your doctor's office is most likely to be closed. Many are also open during daytime hours.

Urgent care centers commonly treat:

- minor injuries and cuts;
- upper respiratory infections/sore throats;
- children's ear infections, and
- fractures and sprains.

***If your condition requires emergency medical treatment, go to an emergency room right away or call 911.***

## **How to choose a primary care physician**

We believe you will benefit from establishing a long-term, one-on-one relationship with a primary care physician within your primary care clinic. Here are the three most common types of primary care physicians:

- ***Family practice physicians.*** These doctors specialize in taking care of the general health needs of people of all ages, from infancy through adulthood. They are trained in six broad areas of medicine—pediatrics, internal medicine, surgery, obstetrics and gynecology, psychiatry and community medicine.
- ***Internists.*** These doctors specialize in the diagnosis and treatment of diseases in adults. They do not perform surgery, deliver babies or treat children.
- ***Pediatricians.*** These doctors specialize in taking care of the general health needs of children, from birth through approximately age 16.

When selecting a primary care physician, you should consider the following:

### **The doctor's training and experience.**

Ask the physician where he or she studied and how long he or she trained. You may also obtain information on the professional qualifications of primary and specialty providers, such as medical school attended, residency completed or board certification, by calling the care system, primary care clinic or the following numbers:

- *The Medical Board of California at 916-263-2382 or online at <http://www.medbd.ca.gov/lookup.html>*
- *The American Board of Medical Specialists at 1-866-275-2267*

### **The doctor's accessibility.**

You want your doctor to be available when needed. Find out the office hours for his or her clinic. Call the clinic and find out how long it takes to schedule a routine visit with the doctor. Also, ask who covers for the doctor when he or she is out of town.

### **The doctor's approach to preventive medicine.**

You want a doctor who emphasizes staying healthy. Note whether the doctor asks you about your eating, exercising, smoking and alcohol consumption, as well as about any health risks you may be exposed to on the job or at home. Also, does the doctor answer your questions about how you can make healthful improvements in your lifestyle?

## **PROVIDER SPECIALTY DEFINITIONS**

**Allergy/ Immunology** - The study, diagnosis and treatment of unusual sensitivities to substances found in the environment.

**Anesthesiology** - The use of medications and anesthetic agents to prevent or relieve pain associated with surgery or other treatment procedures.

**Cardiology** - The study, diagnosis and treatment of diseases and disorders involving the heart and blood vessels.

**General Practice** - A branch of medicine that deals with a wide variety of diseases and disorders in patients of all age groups.

**General Surgery** - The diagnosis and treatment of disease and injury.

**Genetics** - The diagnosis and treatment of and counseling for genetically linked diseases and disorders.

**Geriatric Medicine / Geriatrics** - Medical treatment and concerns of the unique physical, psychological and

social conditions relating to the aging process.

**Gynecologic Oncology** - The medical and surgical treatment of cancers of the female reproductive system.

**Gynecology** - The medical and surgical treatment of diseases and disorders of the female reproductive system.

**Hematology/Oncology** - The study, diagnosis and treatment of the blood, blood-forming tissues, disorders affecting them and cancerous and non-cancerous tumors.

**Hospitalist** - The discipline concerned with general medical care of hospitalized patients.

**Infectious Diseases** - The study, diagnosis and treatment of diseases caused by microorganisms.

**Internal Medicine** - The diagnosis and treatment of a wide variety of diseases and disorders in adults. Internal Medicine Physicians have received advanced training in internal medicine.

**Maternal Fetal Medicine** - The study, diagnosis and treatment of high-risk pregnancies.

**Mental Health** - Mental health is a term used to describe either a level of cognitive or emotional well-being or an absence of a mental disorder.

**Mental Health Counseling** - A mental health counselor is a

trained professional that counsels families, individuals, groups and couples to promote optimal mental health and well-being.

**Neonatal-Perinatal** - The study, diagnosis and treatment of the diseases and disorders which affect newborns.

**Nephrology** - The study, diagnosis and treatment of kidney diseases and disorders.

**Neurology** - The study, diagnosis and non-surgical treatment of diseases and disorders of the brain, nervous system and spinal cord.

**Neuropsychology** - The branch of psychology that is concerned with the physiological bases of psychological processes.

**Neurosurgery** - Surgical treatment of diseases and disorders of the brain, nervous system and spinal cord.

**Nuclear Medicine** - The study, diagnosis and treatment of metabolic, physiologic and pathologic conditions using the nuclear properties of radioactive and stable nuclides.

**Obstetrics/Gynecology** - The diagnosis and management of pregnancy, childbirth and the period following childbirth. Concerned with the study, diagnosis and treatment of disorders of the female reproductive system.

**Oncology** - The branch of medicine concerned with the study and treatment of tumors.

**Ophthalmology** - The study, diagnosis and treatment of disorders of or injuries to the eye.

**Optometry** - The diagnosis and treatment of visual defects using eyeglasses or optical aids.

**Oral Surgery** - Surgical treatment of disorders of the teeth, gums, mouth and jaw.

**Orthopedics (Orthopaedics)** - The study and treatment of the skeletal system and its associated muscles and joints.

**Otolaryngology / Otorhinolaryngology** - The diagnosis and treatment of diseases of and injuries to the ear, nose and throat.

**Pain Management** - The diagnosis and treatment of acute and chronic pain disorders.

**Pathology** - Laboratory study of body tissue and fluids to diagnose disease.

**Pediatric Cardiology** - The diagnosis and treatment of the heart and blood vessels in children.

**Pediatrics** - The diagnosis and treatment of the diseases and disorders which affect children and adolescents.

**Physical Medicine / Rehabilitation** - The diagnosis

and management of the therapeutic use of mechanical devices and physical therapy in the treatment and rehabilitation following injuries and diseases.

**Plastic/Reconstructive Surgery** - Surgical treatment to correct or repair deformed or injured parts of the body and to improve one's physical appearance.

**Podiatry** - The study, diagnosis and treatment of conditions and functions of the foot.

**Primary Care Physician** - A physician who is a family practitioner, general practitioner, internist, obstetrician/gynecologist or pediatrician and who coordinates all patient care.

**Psychiatry** - The study, diagnosis, treatment and prevention of mental illness.

**Psychology** - A non-medical professional who has received extensive formal education in the treatment of mental or emotional disorders. Treatment methods include psychological analysis, therapy, testing and research. A licensed psychologist has obtained a masters or doctoral level education, training in the above areas and is licensed by the state.

**Psychotherapy** - A non-medical professional who is trained in the treatment of mental or emotional disorders. This category includes social

workers (licensed and non-licensed), masters level therapists, licensed marriage and family therapists, and certified clinical specialists in psychiatric nursing.

**Pulmonary Medicine** - The study, diagnosis and treatment of lung disorders.

**Radiation Oncology** - The diagnosis and treatment of disease by radiation.

**Radiology** - The prevention, diagnosis and treatment of disease using a variety of means, including X-rays, ultrasound, computerized axial tomography and magnetic resonance imaging (MRI).

**Rehabilitative Medicine** - The use of physical therapy to restore functional ability to people with disabilities.

**Reproductive Endocrinology/Infertility** - The study, diagnosis and treatment of infertility and reproductive disorders.

**Rheumatology** - The study of arthritis, rheumatism and other related diseases and disorders of the joints, muscles and tendons.

**Specialty, Physician** - A physician who is not classified as a primary care physician.

**Sports Medicine** - Diagnosis and treatment of athletic injuries.

**Surgery Assistant** - A physician assistant who specializes in surgery assistance is involved with patient care from the consultation through the procedure.

**Surgery, General** - The performance of an operation to diagnose or treat a variety of diseases or injuries.

**Surgical Critical Care** - A doctor who manage the overall care of critically injured and acutely ill surgical patients.

**Therapeutic Radiology** - Treatment of cancerous

tumors through the use of radiation.

**Thoracic Surgery** - Surgical treatment of diseases and disorders of the chest.

**Trauma Surgery** - The trauma surgeon is responsible for the initial resuscitation and stabilization of the patient, as well as ongoing evaluation. The attending trauma surgeon also leads the trauma team, which typically includes nurses, resident physicians, and support staff.

**Urology** - The study, diagnosis and treatment of diseases and disorders of the urinary tract (in both females and males) and the reproductive system (in males).

**Vascular Surgery** - Surgical treatment of diseases and disorders of blood vessels, veins and arteries.
